Vahe Petrosyan

Software Engineer · Front-End & Cross-Platform Development

Ararat, Ararat Region, Armenia | +374 94 366580 | vahe.petrosyanvvv@gmail.com | linkedin.com/in/vahe-petrosyan

EXPERIENCE

Software Engineer · InoRain — 2024 – Present

- Build cross-platform applications spanning web and TV, focused on IPTV and hospitality television products.
- Develop Android TV applications using Java and Kotlin alongside React-based front-ends.
- Apply AI-assisted development with Claude AI to accelerate feature delivery, code review, and development workflows.
- Integrate REST and third-party APIs, handling authentication, data fetching, and error states across web and TV clients.
- Build and maintain reusable design systems and shared component libraries to ensure UI consistency across products.
- Manage application state with Redux Toolkit and Zustand for predictable, scalable state across large codebases.
- Work within an Agile development process, managing tasks and sprints in ClickUp.

Front-End Engineer · InoRain — 2020 – 2022

- Developed responsive web interfaces with React, TypeScript, HTML, and CSS.
- Managed application state and data-fetching using Redux, RTK Query, and React Query.
- Integrated backend APIs and normalized responses for reliable client-side rendering.
- Configured and optimized build tooling with Webpack, Vite, and Rsbuild.
